

Team Building

Program Snapshot

Team building is an on-going process that helps a work-group evolve into a cohesive unit. The team members not only share expectations for accomplishing group tasks, but trust and support one another and respect one another's individual differences. Choosing team members that complement and supplement each other ensures productive collaboration and harmony within the organisation. Our training program on Team Building helps participants to

- Understand team dynamics and the skill and behavioural interplay for effective collaboration
- Identify the different stages of team building
- Develop simple techniques for creating cohesive work groups by recognizing each other's strengths and apply the learning at workplace
- Designate clear roles for team members and inculcate positive interpersonal relationships
- Identify and practice new methods of dealing with others that promote team spirit, cooperation and open communication

Our Team Building programs are outbound interventions which incorporate experiential learning methodology - combining theory, simulations, activities, learning games, processing (debrief) and drawing synergies for application at work.
